

Alchemer Workflow Gladly Initiator

The Gladly initiator is included with Alchemer Workflow. If you are interested in purchasing Alchemer Workflow, please [contact us](#) for additional information.

Overview

Alchemer's Gladly initiator is a powerful solution that combines customer service and feedback collection.

With this integration, events that occur Gladly can automatically trigger targeted customer feedback Workflows, enabling you to gather valuable customer feedback at key touch points. This integration simplifies the process of collecting and utilizing customer feedback, providing a comprehensive solution for improving your services and overall customer satisfaction.

With Alchemer and Gladly, you and your team can:

- Initiate a Workflow when a Conversation Closed event occurs in Gladly.
- Looking for other Gladly events? [Contact us here!](#)

The Gladly initiator uses webhooks. Learn more about creating webhooks in Gladly [here](#).

Setup

1. Create a new Workflow.

The screenshot displays the Alchemer Workflow dashboard. On the left sidebar, under the 'PRODUCTS' section, the 'Workflow' option is highlighted with a red box. The main content area shows a list of workflows. The 'Create New Workflow' button is also highlighted with a red box at the top of the workflow list. The workflow list includes three items:

Workflow Name	Status	Date	In Progress	Completed	Steps
Gold Demo Certification Process	Inactive	Aug 2, 2023 4:25 pm	0	2	9
New Webpage Design- Feedback Program	Active	Mar 29, 2023 2:24 pm	1	0	19
30/60/90 Employee Evaluation	Active	Mar 29, 2023 11:35 am	0	0	30

7. Within your Gladly account, create a Conversation Closed Webhook that, once fired, will initiate your Workflow.

For more details on this process, you can review [Gladly's documentation here](#). Make sure to select CONVERSATION CLOSED from the Events search picklist when configuring the webhook in Gladly.

7. When composing the new webhook, set the Webhook URL to the endpoint supplied by Alchemer.

8. Click the "Save" button to complete configuration for this initiator.

Merge Codes

When the webhook fires, Gladly will pass the following fields to Alchemer Workflow. After configuring this initiator, you can use these fields in merge codes, logic, and other Workflow features.

For more information on how to use these merge codes in your Workflow, [check out this article](#).

Use Case

TechSolutions Inc. relies on Gladly as its primary customer service platform. As a company they want the ability to collect timely and relevant customer feedback after customer interactions end, but currently they struggle with inconsistent and manual feedback collection processes.

To address these challenges, TechSolutions Inc. utilizes the Alchemer Workflow Gladly initiator. This initiates feedback Workflows automatically when a "Conversation Closed" event occurs in Gladly.

The Alchemer Workflow Gladly initiator enables immediate feedback collection, allowing TechSolutions Inc. to promptly address customer concerns. Additionally, this integration streamlines the feedback process, ensuring consistency and efficiency in collecting feedback after every customer interaction.

FAQs

▸ What permissions do I need within Alchemer to set-up and use the Gladly initiator?

▸ Can multiple Workflows initiate off the same Gladly initiator?

▸ This initiator doesn't fit my use cases, or I want to provide feedback to the Alchemer Product Team!
